## Logosease Receiver

Price: open price

### "Instruction with voice in a lesson" and "Explanation with voice in a tour".

Logosease Receiver is to receive only not to transmit. The unit can receive voices transmitted from underwater two way radio Logosease. The unit is useful in various situations. For example, underwater, an instructor gives instructions to the student, an advanced diver speaks to a trial diver or a beginner to release his/her anxiety, divers listen to the guiding voice from Logosease, and a diver speaks to freely in fun diving.

Several receivers can receive voice simultaneously.

A Diver with  
Logosease two way radio

A Divers with  
Logosease Receiver

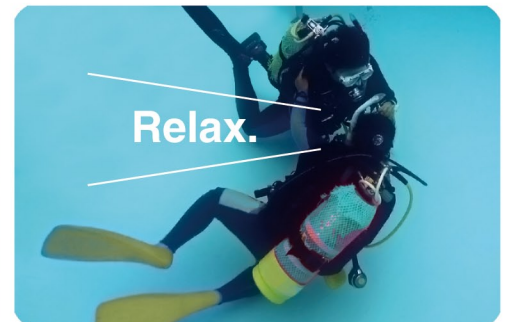

#### Examples

Giving instructions underwater continuously without getting out of water.

Tour with voice guide

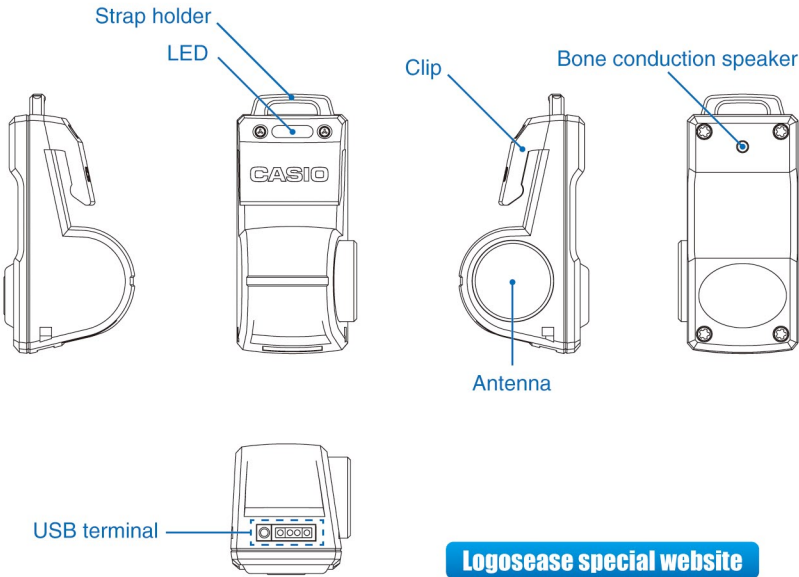

Remove anxiety from beginners by giving advice.

LGS-RG004RX

# Logosease Receiver Main Specification
